16	diverse +
17	revealed +
18	decree -
19	apply +
20	lead +
21	restriction +

Writing

Invention of the Internet was a changing moment in human history. It allowed people to exchange information in mere seconds and gave access to almost all information gathered from all over the world. Nowadays anyone can find information they need, and that is great. But, ~~as~~ as time passed, Internet was evolving, and it evolved in many ways. It became faster, more user-friendly and accessible. It became better and better. And if more and more people were gaining access to the Internet, more and more people would also gain access to the Internet. And now the Internet is flooded with malware and online scammers. But now this problem is ~~being~~ getting solved, because people started developing anti-malware programmes and learned how to avoid scam.

Also with arrival of the Internet ~~people~~ a new invention was introduced to the world — social networking sites.

This was a revolution in remote communication. People could chat with their friends, share photos and videos together from their homes! ~~But~~ But this also leads to ~~too~~ reducing personal meetings, which is bad. And this is still a huge problem, that needs to be solved.

In general, I think a quick access to everything in this world is great. But people should use it with caution, because it can become a source of big troubles.
